BURGLARS SMASH WINDOW AT SCOTTDALE, GET JEWELRY AND OTHER GOODS WORTH $2,000

Special to The Courier

SCOTTDALE Feb 16—Several men in an automobile drove up in front of the jewelry store of Clement Kropf, about 2 30 o clock this morning a brick was hurled through the window and jewelry and other articles valued by the proprietor at $2 000 were stolen The burglars got away before the alarm could be raised

Included in the loot were several diamond rings that had been left in the window

Mike Demma a fruit dealer living over his store on the opposite side of the street heard the machine come to a stop and also the crash of glass He said the engine was kept running with evident purpose of drowning the noise of breaking glass

Demma called the police but all trace of the machine and its occupants had been lost

No effort was made to get in o the store The work of gathering the articles in the window consumed a very brief time Demma said

About a year ago yeggmen blew the safe in the Kropf store but were frightened away before they secured any of the contents

Winter winds and the complexion

Lovers of the winter outdoors will find in Resinol Soap and Ointment most valuable aids for combatting its bad effects on the complexion. Use of harsh caustic soaps often promotes chapping and redness. But the purity and soothing quality of Resinol Soap tend to prevent such conditions. If however the skin has become chapped a little, Resinol Ointment stops the burning and smarting and keeps the skin soft and smooth. Be prepared to enjoy winter. Protect your skin by using Resinol. *At all druggists.*

WEDNESDAY EVENG, FEB. 16, 1921.

WHY RE-SURFACING PLAN IS FAVORED.

Although the members of the city council have thus far made only a preliminary investigation of the resurfacing method of repairing worn brick streets, the information so far supports the contention that it is very much less expensive and more satisfactory than repaving with vitrified brick.

City Engineer Hounshell's estimate of $5,000 as the cost of resurfacing all of East Crawford avenue expect the report portrayed forms so striking a comparison with $150,000 or more as the estimated cost of repaving with brick that the possibility of saving $140,000 or more on the job appeals very strongly to both members of council and taxpayers.

It has been held that the cost of resurfacing in other cities has been less than the cost of repaving, but it is highly probable that the estimates of Engineer Hounshell show that the cost in Connellsville would be lower than in other cities. We have all the raw materials except asphalt close at hand which is an advantage not possessed by many other towns and cities. Another feature of the asphaltic resurfacing system which gives it preference over brick is the great saving in time required to lay it. Applying the modern method it is not necessary to remove any part of the existing pavement, or have except where the latter need to be made more substantial. Merely removing the dirt from the worn brick is the only work required to prepare the street to receive first the binding, then the wearing courses of the asphaltic cement. Within a few hours after the binding course has been laid the street becomes sufficiently to permit the street being used in necessity. In paving with brick more time is required to prepare the bed upon which to lay the bricks than is consumed by the whole process of resurfacing with asphaltic cement. The saving of time is itself a valuable consideration in that the interference with traffic is inconsiderable.

All of the advantages of the new over the old method of repairing streets are recognized by the members of the city council but they have considerately deferred action pending improvement in Mayor Duggan's health and the securing of more definite information by the city engineer from cities having had extensive experience in the use of the new method of repairing worn brick streets.

WILL BE A STRONG CABINET.

The newspapers of the entire country have been working over time for several weeks in constructing a cabinet for Warren G. Harding who will soon assume the duties of president of the United States.

Mr. Harding however has so far refused to seriously discuss the make up of his official family without advisers.

It is generally agreed says the Greensburg Tribune that Mr. Harding has invited A. W. Mellon the well known Pittsburg banker to become secretary of the treasury. Mr. Mellon eminently successful as a businessman has not so far as known taken any of them into his confidence but the belief is growing among them that he has received the invitation of the president-elect and has determined to accept it at the proper time.

Former Justice Hughes of New York spent last week-end with Mr. Harding down in Florida. Mr. Harding admitted to asking Justice Hughes to visit him and declared that his purpose was not to offend Mr. Hughes during his southern visit. Popular impression gives the head of the cabinet to Mr. Hughes. He is considered a qualified in every possible way for the premiership.

Very general belief prevails that WILL H. Hays chairman of the Republican national committee will be made postmaster general and no doubt one he would make at that but Mr. Hays continue to give all his time to his political affairs as the public wants rather frequently for word from those who actually know just been and when Mr. Harding's official family will be made up.

There is confidence that a strong cabinet will be selected by the incoming president and that his administration will be a great relief to the whole people.

The first gardeners beat the first robins as the harbingers of spring or the advance agents of a cold snap whichever subsequent weather events may prove it to be.

When Chief Tom takes his place behind the wheel of the police flivver council is to provide that a new terror will be added to the troubles of evil doers in Connellsville.

Brer Groundhog is not discouraged. He has four weeks yet during which to even up scores with the weather man.

The women voters of the state ought to be interested in helping put over the bill that would permit them to tell the register-assessors they are over 21.

War Indemnity

[illegible]

In 1871 Germany exacted from France a war indemnity of $1,000,000,000. Not until the total sum was paid did the invaders retire. The Germans assumed that the right to compel payment was undisputable.

How does the tribute of $1,000,000,000 which Germany presented to France compare with the tentative $1,000,000,000,000 bill which the Allies have submitted to Germany?

A great change has occurred in the purchasing power of the gold mark in the 50 years. Gold has depreciated more than one half. So on the basis of 1871 gold it does the tribute not amount then $500,000,000.

Second the present population of Germany is about double that of France in 1871. Measured by population with which it proposed of Germany must be assessed in order to make it comparable to the reparation of France indeed relatively this bill is $2,000,000,000.

Third in the matter of wealth per capita in Germany is somewhat higher than in France. Allowing that half of this difference is due to gold depreciation the other half may be ascribed to a greater increase in wealth accumulation and extension of cultivation in two years. Accordingly to arrive at a true comparison this bill should be reduced to $2,500,000,000.

Finally the Germany bill in 1871 was not to be paid in cash. It was to be paid in annual installments. Germany is not in a position to be disturbed but other Allied nations. On account from 1871 to 1921 got nothing for the war expenditure. Only about one half of the money to be paid by Germany was to be paid to France. Since the poorer and more populous provinces billions though Germany may be able to pay the bill in 50 years the taxpayers will be burdened more than those of any other nation.

* * *

It is high time to analyze what the new Germany policy means. It means not only that Germany is to pay relatively but more than did France in 1871 but that in the meantime Germany having [illegible] war is to emerge from the conflict in a condition to distress France in economic competition.

Anyone who would benevolently allow Germany to go scot free is seeking to place on France the burden he lifts from Germany. No one can have the matter both ways. The damage is done. No reparation can alter this fact. The only question is how one. All that is possible is to decide which of Germany or France shall pay for the war. Anyone who says that Germany needn't pay France must in strict accuracy the present generation of Germans which Germany shall pay the bill of France. It pay it. It does not seem right that Germany should escape payment to the same amount as France.

Legion 's No Tool

[illegible]

Commander J. W. Galbraith of The American Legion has no mind to let the Legion be used to advance the ends of the Germans or by the other selfish interest. Edmund von Mach [illegible] notice to all has to make public protest against the intention of Mr. [illegible] continuing among the French forces now occupying territory formerly owned by Germany. Commander Galbraith refused and promptly showed Mr. von Mach the door.

There are lots of people who for their own ends would like to use the formidable influence of the organized American veterans of the world war. The constitution of the union adopted at St. Louis May 10 1919 names the upholding of the constitution the maintenance of law the perpetuation of pure Americanism the conservation of hallowed memories the promotion of peace and good will and other laudable and patriotic purposes. But the entire tenor of the document [illegible] section denotes that the Legion is not to be [illegible] any political purpose. The Legion is its own boss. The [illegible] would like to use the Legion [illegible]

MRS. MARY JANE FALK, 74, DIE

Monday Musical Club Is Entertained by Mrs. Walter P. Stauffer, Plant of Sherman-Stiveson Tire & Rubber Company Soon Ready for Operation.

Special to The Courier

SCOTTDALE, Feb. 16.—The Western Union telegraph office was opened to day. The new office is in Spring street in the building recently built by Jesse Cook. It is in charge of M. J. Hysson of Chambersburg.

Mrs. Mary Jane Falk.

Mrs. Mary Jane Falk, 74 years old, died Monday night at her home in Kingsview. Funeral services were held this afternoon and interment was made in the Penn Mills Baptist cemetery. Mrs. Falk died from the infirmities of age. Her husband is ill in bed.

Monday Musical Club.

Mrs. Walter P. Stauffer entertained the Monday Musical club at her home here on Monday evening. Those who took part on the program were: Mrs. Elizabeth Anderson Morton, Miss Pearl Keck and Mrs. William Brickman, Connellsville, and Mrs. C. J. Kelly, Mrs. Thomas Dawson, Miss Margaret Kritschgau, Mrs. Frank Monaghan, Mrs. C. L. Stone, Mrs. Estelle Miller Shallow, Mrs. Leo Skemp, Mrs. Arthur White and Mrs. Cecile Glenn. Refreshments were served and a social hour followed the program.

Plant Nears Completion.

The Sherman Stiveson Tire & Rubber company is getting everything in readiness for the building of tires in the early spring. The machinery is all installed. Photographs of the machinery installed are on exhibition at Lowes' drug store. Electrical engineers are now connecting up the lines for the different machines. The general manager of Columbus, O., has taken a house on Spring street and moved his family here. He is now at the factory supervising the work preparatory to actual operation.

Mountain Ash Choir.

The Mountain Ash choir will not come to the Baptist church here until March 16, and Mrs. W. W. Eicher will not give the talk this evening at prayermeeting. Instead there will be a talk on the study of "Principals in the Life of Jesus." Next week Miss Johnson will speak in the place of Mrs. Eicher.

Valentine Party.

Miss Cleoria Richter of Mulberry street gave a very pleasant Valentine party at her home. Dancing and games were the features of the evening. The hostess sang two selections during the evening. Miss Ruth Dillon recited. The out of town guests were Misses Winona Smith and Ruth Dillon of Mount Pleasant.

NEUTRALIZE ACIDS IN YOUR STOMACH

GET RID OF INDIGESTION.

Few people realize the importance of keeping the stomach free from excessive hydrochloric acid. Yet Nature says this is the cause of nine tenths of stomach troubles. The food ferments and ferments bringing Gas, Heartburn, Pain, Bloating, Indigestion, and the stomach pains that are so painful. Nothing else relieves so well. Tiny tablets of Pepsin and Bismuth give only temporary relief and often do harm.

Neutralize or sweeten the stomach with a glass of water with a teaspoonful of Magnesia. Magnesia neutralizes the acids and gives relief. Get two ounces of Bisurated Magnesia from any reliable druggist and try this. A few weeks of this will show you what you want and enjoy your meal.—Ad.

BEST DECISION I'VE EVER MADE

Harrisburg Man Gains 16 Pounds Since Taking Tanlac. Nine Years Suffering Overcome.

[illegible]

During all the years I suffered from a bad case of stomach trouble. After every meal I had a terrible feeling in the pit of my stomach and had such smothering sensations I would do to lie down. My appetite was so poor that [illegible] place of good nourishing food [illegible] other times I could not do anything. Frequently I couldn't retain anything on my stomach.

My nerves were so shattered I could not sleep. I felt worn out and weak. I had taken all kinds of medicines without results. I became so badly run down and so nervous I was a burden to myself.

But I kept hearing so much about the wonderful good Tanlac had done, I decided to try it myself. And it was the best decision I ever made. Tanlac helped me from the first. I now eat three hearty meals a day and never feel a touch of indigestion. My nerves are steady and I get plenty of good, sound sleep every night. I feel world and wide up in the morning and fit for whatever comes to hand. That's just what Tanlac has done for me and I will get a good word from me any day.

KEEP LOOKING YOUNG

It's Easy—If You Know Dr. Edwards' Olive Tablets

The secret of keeping young is to feel young—to do this you must avoid your liver and bowels. There is no need of having sallow complexion, coated tongue, sunken eyes, spots, a bilious look, a lazy feeling, dull eyes with no sparkle. Your doctor will tell you ninety per cent of all sickness comes from active bowels and liver.

Dr. Edwards, a physician in Ohio, perfected a vegetable compound mixed with olive oil to act on the liver and bowels. Now sold to the public as Olive Tablets.

Dr. Edwards' Olive Tablets are a substitute for calomel, but unlike it they do not gripe nor sicken. They are guaranteed to be a safe, gentle laxative, yet thorough in clearing the system.

Dr. Edwards' Olive Tablets are for sale by all druggists, 10 and 30 cents a box.

BALLOONING IS SAFEST SPORT

Control of Both Speed and Direction Is Possible.

IS NOT AN AIMLESS PASTIME

Pilot Is Complete Master of His Craft in All but Foulest Weather—Champion Clears Up Many of the Ideas That the General Public Believes Are Characteristic of This Sport—Science and Pure Humar Guessing Are Delightfully Blended

The safest and most sublime sport in the world one where science and pure human guessing are delightfully blended according to Roy Upson is not astronomy no nor fishing It is balloon racing and he ought to know for he is the present international air title holder among all who go sky yachting In the course of a recent interview he made it a point to bump up many of the ideas that the public firmly believes are the characteristics of this sport writes Henry Chapin in the New York Post

It is not the aimless pastime one imagines when he sees the great yellow globes lifting through the clouds The pilot has exceptional control of it for all but the foulest weather and can deftly work out his course either for speed or direction as the occasion demands Of course there is no control at all times but it is the weather that is also his best friend and his success as an aeronaut depends on just how much of a friend he can make of the weather This is where science comes in

The type of air craft he uses in the sport comprises balloons of various sizes storm cutters and the varieties of the winds No matter how carefully the pilot is balloon inflates the price he pays follows the instruments of the sport are spent on gas Bags the gas and the gas bags are the most costly Upson has landed in Canada in the most remote regions that he ever visited and most of his adventures have occurred in Canada where he has spent his fortune in balloon racing

Nearest Sport to Big Yachting

As far as I know it is the nearest thing to big yachting in the world and has all the exactness of true competition Instead of a yacht race Where the skipper of a yacht plots a course he should and his balloon of course is as nearly perfect as can be gotten and only costs in the neighborhood of $10,000

It is the greatest sport because we are no longer the plaything of drifting clouds or combining low and high pressure weather conditions adverse readymade for our purpose As we usually go faster than the winds and whatever the winds there is no motion in the basket to betray it hence we are blowing in different strata of air moving in different directions

This is the thrill of the game Upson explained to me What makes it safe is that the balloon is of the earth so absolutely that the terrible stratum of pressure that one would imagine forces from the winds are not felt at all He describes the pilot as the quietest and most sublime creature on earth so to speak

Everything is measured and balanced exactly when the balloon leaves the ground There is even a gage for measuring out the sand ballast which is used through out the flight as the bags are lightened overboard and as fast as they can be emptied As long as the balloon is in sight a constant process of orientation is carried on by means of sighting objects drifting past with paper or toy balloons and by triangulation with a telling measuring instrument

When the clouds shut in the pilot has no less a *little more but his aid* is in hand to collecting all the data of the pilot scratches his head and figures out whether a few hundred feet up or down will or bring a helpful change in speed or direction

In the Great International Race

It was just this careful guessing that won last year's international race from St Louis with Upson landing at Indian Cove Quebec Province of Canada deep in the Canadian wilds Speed in her race direction was the thing the riders were after

Upson took a direction apparently from out of his best course but by sudden change two hours ahead of a storm center that passed most of his competitors to come aground His storm carried him across the Atlantic bay and then swept him down the Labrador In the flashes of lightning he could just make out some land a few miles off He decided to come down and the next thing he knew he had bumped off a barn roof into a cow pen It was the only habitation for miles around and he had dropped into the center of it in the dark of night

It was the race and proved once again that a balloon can travel east long enough at times is the shortest way to victory

BEST BOXING CARD OF SEASON TONIGHT AT SLAVISH HALL

Tommy Ryan and Jimmy Lavender Primed For Star Bout.

GOOD PRELIMINARY LIST

BOUTS TONIGHT.

Battling Burkett vs. Buck Krouse—six-round preliminary.

Johnny Pollock vs. Young Zabish—six-round semi-final.

Tommy Ryan vs. Jimmy Lavender—feature bout, 10 rounds.

Devotees of the boxing game in this section will witness one of the best fistic encounters ever staged at Slavish hall when Tommy Ryan, bantamweight fighter of McKeesport, looks up with Jimmy Lavender, the Pittsburg speedster. Both boys are primed for action and their contest will undoubtedly be one of the fastest fought battles ever seen in this vicinity. This is rather a bold assertion in view of the fact that every bout staged on the West Side has been of the hurricane order, but as Ryan and Lavender have planned to speed for the scrap it promises to eclipse any staged so far this season.

Should Lavender come under the wire a winner he will assume the best laid plans of promoters and his next target is the Tube City battler is practically matched to meet Joe Lynch in Pittsburg. He also is booked for a bout on Saturday night. Lavender is being picked by the wise ones to pick up winner.

Ryan and Lavender were both scheduled to arrive in this city early today and to weigh in at 119 pounds at 2 o'clock. Each posted a forfeit to be at the required weight.

The semi-final bout which features Johnny Pollock, the Dawson slugger, and Young Zabish of Pittsburg, has aroused more than the usual interest. Local fans will be coming strong for Johnny to knock the Smoky City walloper. Should Pollock land one of his pile driving punches his manager will immediately send him after the best boys in Pittsburg.

The opening bout will bring together Battling Burkett of South Connellsville and Buck Krouse of Broad Ford. Each will have a host of friends at the ringside to urge their favorite on to victory.

The first bout will start promptly at 8:30 o'clock and the club has made arrangements to handle the largest crowd of the season.

30,000 CHINESE WAIT VAINLY FOR FOOD, THEN DIE

Harrowing Story Related by E. S. Gilnes, Returning American Engineer.

CROPS FAIL FIVE YEARS

Other Provinces Lying Hand to Mouth and Unable to Succor Those in Direst Distress; Tales Coming Out of Republic Not Exaggerated.

By Associated Press

NEW YORK, Feb. 16—Thirty thousand Chinese gathered on a great bare hill outside Tientsin, China, waited patient for food which never arrived and then slowly died, there P. S. Gilnes, American engineer, reported upon his arrival here after spending six months in the famine-stricken areas of North China.

The condition of the starving hordes was so pitiful, Mr. Gilnes said, that he did not have the heart to take photographs of such misery. He said that the crowds at Tientsin had gathered because they believed food would reach them there more quickly than in the country. Along roads for miles the field beyond of carts, the bodies of whole families, of their mother and five children, each a few and spare where they had dropped and died.

The crops failure have been almost complete in the five worst provinces that make up the northern part of China, proper, Chihli, Shantung, Shensi and Honan, with Mongolia and Manchuria.

Explaining why the sections of China not stricken by famine were unable to relieve the stricken districts, Mr. Gilnes said China is largely an agricultural nation. Nine-tenths of the population live on the farms into which the country is divided. The crop was there and enough but they can at most raise enough for themselves. The districts can raise enough food to supply the prosperous cities, while the prosperous provinces have been able to do so, still for the famine-stricken areas "they have not the to send."

The crop in North Chihli failed, and the people have been unable to get enough of food for their part of the country. They have been able to send from and west, and at high prices, but they have not been able to get enough food for the people of the country. They have been able to send food to the people of the country, but they have not been able to send food to the people of the country.

An Adventure Romance

By George Agnew Chamberlain

Copyright, The Bobbs Merrill Company

With suspicious suddenness Mr Randolph proceeded to forget half his school and clubmates and cold blooded it I have them to their fate and a night out not without coming to grief on at least one occasion however "What are you comin over me? demanded the irate captain of the Nth precinct "You ain't forgot that you was ally to R H Randolph for seven years have ya? Has all his frens gone on the wagon?"

It looked like a loop hole Sure said Slim Hervey promptly "His clothes near busted what with water drinkers and softs'

'Sounds kind a phony to me said the captain grimly "considerin' you took this same gent home a week ago come Friday"

'Did I?" said Slim and with feigned surprise managed finally to recognize the mess of evening clothes that was huddled on a near by bench "You're right Captain He's drunker than I ever saw him before and besides he's swarth a new set of shirt studs Kind of changed his looks'

Slim lingered I look here he murmured to the captain confidentially 'You're on to me but just let me whisper I'm getting to be the delivery wagon for all the high spot soaks in town The first one of em that loses his jewelry between the curb and his own front door, just tell me where I get off will you? I'm honest, I got a reputtion an I tell you, Captain, I'm willin' to bill you through for you when you ask for the home port, but it's a lot on me handlin all the high explosive freight north of Forty second street Get me?'

"Sure Slim" said the captain appreciatively "I'll pass the word, lad"

Thus did Mr Randolph make good his new front name and a little capital besides working on the stalwart

"I'm Getting to Be the Delivery Wagon for All the High Spot Soaks in Town"

old nose Everybody knows is a least hysterical of becoming a tissue in consequently anarchism to the force an impression was created that Slim was a hustler boy from whitehall ready to sacrifice a life or two that he might sit high up alongside Cassius wine Pausing at two or three strategically placed filling stations during the wind before the dawn to relief said drinks as were of his acquaintance he was able to give the glad hand of farewell to a job not to his taste

About this time a series of coincidences befell the young and fevered knight of the city of New York which would have given pause to the persons involved had they been able to get together and compare the dope Take what happened to Miss Georgiette Hetzon He people had played in hard luck and died Georgie had secured a job and was doing pretty well at it until young Doctor Bones met her and so badly persuaded her that she was threatened with galloping consumption Once he had frightened her the rest followed easy he would take her out of bad ventilation into his run about and the open air—out of the goodness of his heart and the fullness of his purse he would take care of her

He began by leading her to a Northclimb Show and supper afterward They dined a little and for the first time in her life but under medical advice she took something in the way of stimulant after the initial pretzel Hall This issued from supper and it was then Mr Chauffeur Slim Hervey heard the whispered address that the game became a threesome

Counting upon the distraction or rather, the concentration of his fares on interior furbishes Driver Hervey soon switched his cab from the clear road to and made for down town streets through silent back streets In just ten minutes he drew up at an old fashioned house in a very quiet square shut off his engine to the idle and waited Not for long Out of the cab came a blasphemous exclamation in medical tones and with it a cry of awakening from the right Through one window she looked upon the home of her childhood through the other upon that happy tailed garden square which was the unhappiest garner close of all her dearest purest and dreamiest memories

"Oh" she gasped "No you mustn't would him This is just where I want to get out and walk It's—I'm extraordinary Then from the cab I may be going to die of consumption doctor but after all, I'd rather—each die that way

Twist things around a little and you'll get what happened to Miss Terry de Guest with the difference that that beautiful and hunkty young woman who had all but turned her back on Settlement work and her face to the Great White Way suddenly awoke not in the moonlit embrace of Chilmonte but before the accusing face of a House in Henry street

Nor was Mr Slim Hervey partial to sex in salvation There was the instance of young Bertram Blossome who shame facedly hurried into his cab a painted, wan faced wraith of the street with self accusing eyes No use this of hunted and hunter—rather two starved bits of weak humanity driver before the unleashed lions of poverty and lust How cadilly and unquestioningly the boy slipped from the cab at his home address miraculously confused almost as by the meddling finger of God with one very different! How gratefully the girl took the possible fate and something over and how her lovers behaved when ten minutes later the blue eyed chauffeur a wage earner like her self said Nothing doing Sister I'm ride is on me and promptly whirled away'

While all these incidents were engaging each in its own way and showed a reasonable profit to all concerned, Mr Randolph looked upon them more or less as a means of getting in his hand during a period of initiation Once he felt sure of himself and of his new chauffeuring point of view and attitude toward the gay world from the under side he began to haunt the neighborhood of East Ninth street at the hour when dinners are plenty and taxis scarce

Twice he saw Miss Madge Van Tellier carried off in somebody's private car but he was not discouraged for he recognized in the very fact of that public privacy the badge of preliminary outings In due course his night and hour came He was hailed by the arriving Mr Beecher Tremont and ordered to stand by twenty minutes later he was listening to that gentleman explaining to Miss Van T that a cylinder had gone wrong on his own car at the last moment

Miss Madge Van Tellier upon whom Mr Randolph had not laid eyes since the very definite parting of their ways on the rock of ready cash was more beautiful tonight than at any other time since the evening of her coming out party The reason was one and the same Tonight as upon that other she stood within a threshold and peered out on life with [illegible] A flame was in her cheeks and in her eyes her lips were half parted and thirsty her bosom agitated She was divinely dressed

They were very silent on their way to dinner at the Knickerbocker but they exuded an aura of [illegible] that made nothing of the glass barrier between them and the cab pilot who soon felt himself lifted and carried on his way Sou Chin was cooking a wonderful dish and he then and there determined to start a fire though the rust of the pie just before the smell of burning

There is nothing more stimulating than a night run before the fever hounds of New York It is invariably a four act play that starts with a sin

Senreco

The double-service tooth paste, keeps teeth clean AND GUMS HEALTHY.

Keeping the gums healthy and the mouth sweet is very important to health more teeth are lost through the loosening of the tissue that holds the teeth in place than from decay

Dentistry of to-day demands that a tooth paste must keep the gums healthy as well as clean the teeth

Senreco was formulated to meet this requirement Hundreds of dentists are prescribing and using Senreco because they have found that it does measure up to that standard

SENRECO IS A WONDERFUL CLEANSER.

In addition to its remedial properties Senreco is a wonderful cleanser; acts directly on the mucous film the basis of cavities leaves the mouth cool and clean feeling As some one has expressed it—Senreco gives one a new idea of mouth cleanliness

Get a tube to day at your druggists or toilet counter—enjoy the healthy, cleanly feeling it gives your mouth and gums Notice how brilliantly white Senreco makes your teeth It performs this two-fold service for you and at cost no more than the ordinary old-fashioned tooth paste that simply cleans the teeth and leaves a pleasant taste—
